ReduxToolkit

## PROJECTS

### E-commerce Project

#### Bano Qabil Course Final Project

- Developed a dynamic e-commerce website using React Js, Express, and Mongo DB.
- Designed a user-friendly interface with essential features, like user authentication, Product management and an efficient shopping cart system.
- Built RESTful APIs with Express js to for smooth data exchange between the frontend and MongoDB database.
- Implemented security measures such as bcrypt for password encryption and token based authentication with JWT to ensure the protection of user data and maintain system integrity.

### Personal Blog website

- Developed a blog website with user authentication, enabling login and signup functionality for secure access to content.
- Integrated appwrite for strong user data (name, email, and password ) and ensured smoothly login and registration process.
- Configured Redux Toolkit to manage application state efficiently, allowing authenticated users to create, edit and manage their post seamlessly.

## EXPERIENCE

### Freelance React developer

11-2023

#### Fiverr

- Delivered High quality, responsive websites for clients, utilizing React js and modern web technologies to meet specific requirements.
- Collaborated closely with clients to understand their needs and provide customized solutions, ensuring clear communication and timely project delivery.
- Implemented best practices in frontend development, optimizing performance and user experience, while maintaining a strong focus on code quality and scalability.
